

An Interview With The Big Bad Wolf

- What are some ways we can enrich children's understanding of stories and their enthusiasm and skills in reading and writing using ICTs?
- What can you do with photos or visual documents(eg.Kidpix)to create a story?
- How can you manage this realistically with your class?
- How can we keep it simple, slow it down, and make it meaningful?

Recording Voice In Garage Band

- Record the whole class reading a big book.
- Record individual children reading stories they have written.
- Take parts and act out the story. Record.
- Interview a child who 'plays' a character.

This is like the David Bain trial but it's Mr. Big Bad Wolf. Write down 5 questions to interrogate Mr. Wolf. With kids we might give them some question words to work with. Make them as stupid as you want. We're on holidays. O.K. Who wants to be the wolf?

Click Voice for an Audio Only Podcast

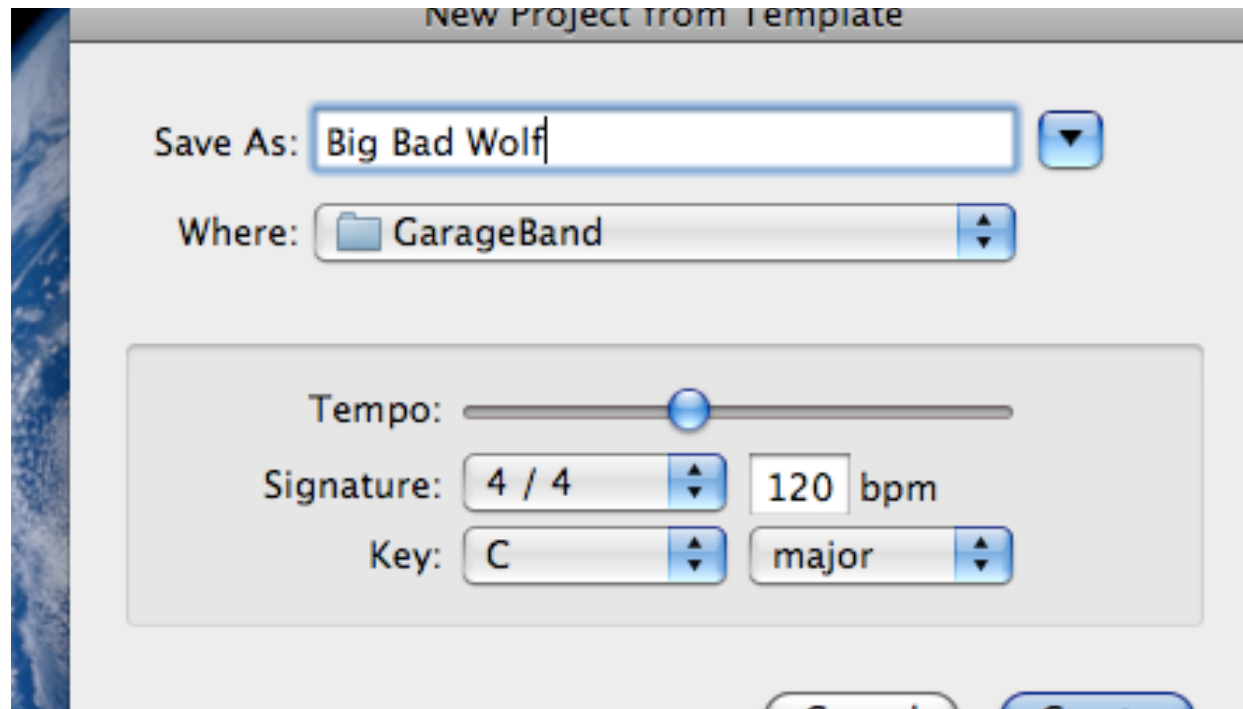

You can create podcast with only spoken narration or dialog, or add musical backing tracks or sound effects.

Click Podcast

You can create an enhanced podcast episode that contains artwork or photos.

Type a title

1. Click Podcast Track

You can add photos,
movies, or iTunes music

3. Click
Photos

5. Drop a
photo here

4. To view
track editor

2. Click to View
Media Browser

1. Click
voice

2. Enable
recording

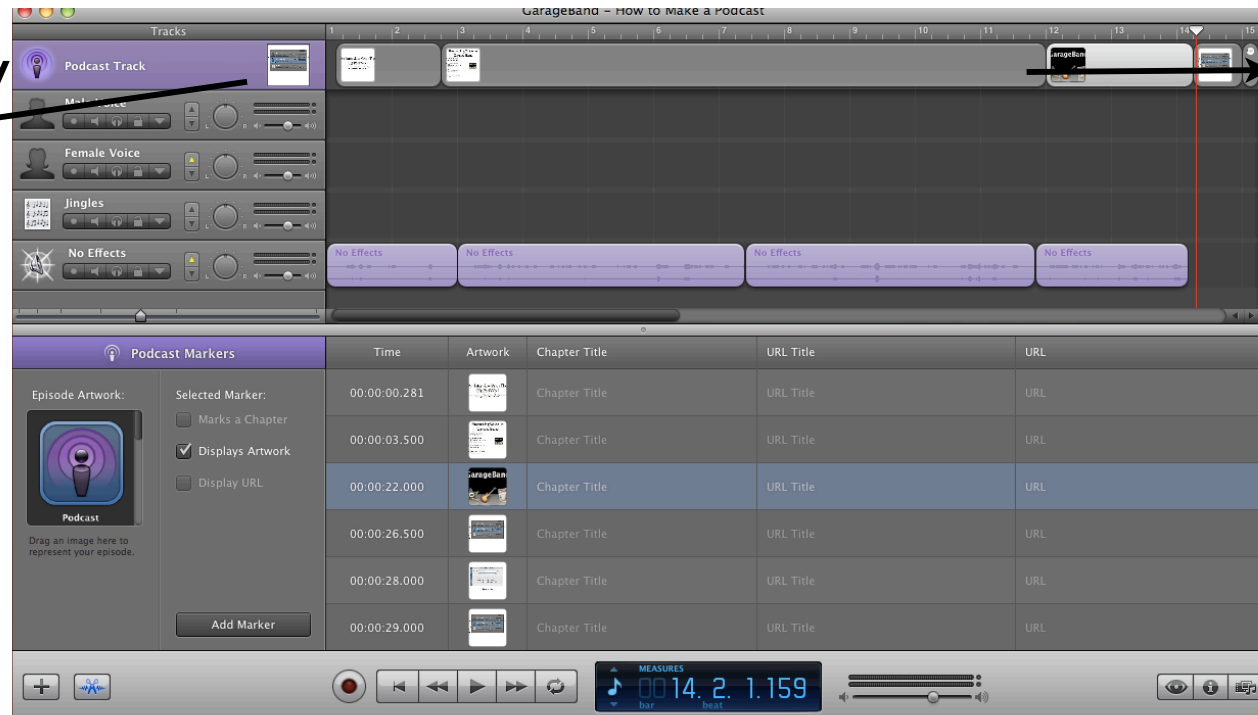

Lead track

I. Click record.

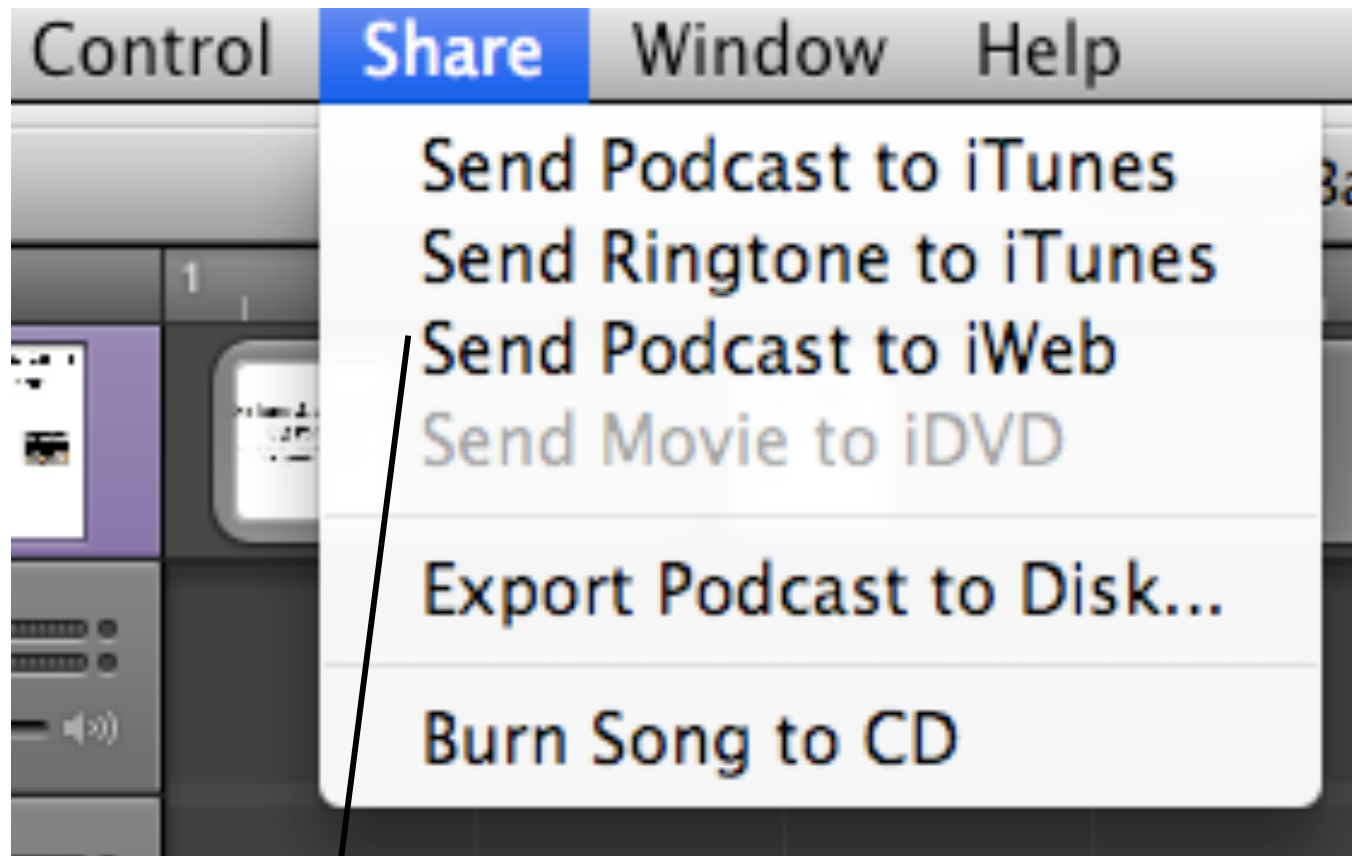

You can use your computer's internal microphone or an external microphone.

Click on the little box to see a preview of podcast and edit the photos

Drop photos into podcast track.

You can move photos along the track to time them with the voice or audio track.

You can send a podcast to i-Web. You can do this but we won't upload them to the internet right now.

Let's try it. Take five photos of your picture book. Load the photos into i-Photo. Open Garage Band and with a partner, record yourself reading a few pages. Drop a photo in as your cover. Try dropping a few photos into the podcast track. Don't worry about getting them in the right place for now.

We have five slides we made in Kidpix. What can we do with them?

- Make a Kidpix slideshow. Add voice. Play.
- Print Kidpix slideshow into a book.
- Export individual Kidpix pages as JPEG to documents. Use in a Keynote presentation.
- Export to i-Movie to use as a clip in a movie.
- Export the slideshow as a Quicktime movie. Upload it to the internet. (BLOG/WIKI)
- Save PDF of a Kidpix document to i-Photo and create a book, calendar, or card.

- Take a photo of a page of your picture book.
- Import the photo to Kidpix as a background.
- Edit it, draw on it, record voice on it.
- Create 3 slides. Try out different tools. Save them.
- Create a slideshow with your slides. Play.
- Export your slideshow as a quicktime movie.
- Save a picture as a JPEG to use in Keynote.

Click on this button in right hand corner of the screen. It will help you navigate. Turn the sound off if it is annoying.(F10 at top of keyboard)

Integration with iApps

Now you can import your pictures directly from iPhoto albums, add your favorite tracks directly from iTunes playlists, and bring more fun to iMovie projects with Kid Pix drawings and animations.

In this chapter you will learn about:

- Importing Pictures from iPhoto
- Importing Sounds from iTunes
- Working with iMovie Projects
- Importing From GarageBand
- Exporting to iPod Format

Importing Pictures from iPhoto

You can browse through your iPhoto digital albums directly from Kid Pix. Photographs you store in your iPhoto library can become a part of your Kid Pix picture.

To import a picture follow these steps:

1. From the **Import** menu, choose **From iPhoto**.
2. The **Kid Pix: Import From iPhoto** dialog appears.

Note: If you have moved, renamed, or deleted the iPhoto library that was stored in the default location (the folder **/Users/username/Pictures/iPhoto Library**), you cannot import any photos from your iPhoto library unless you restore it to this location.

The slow hard way.

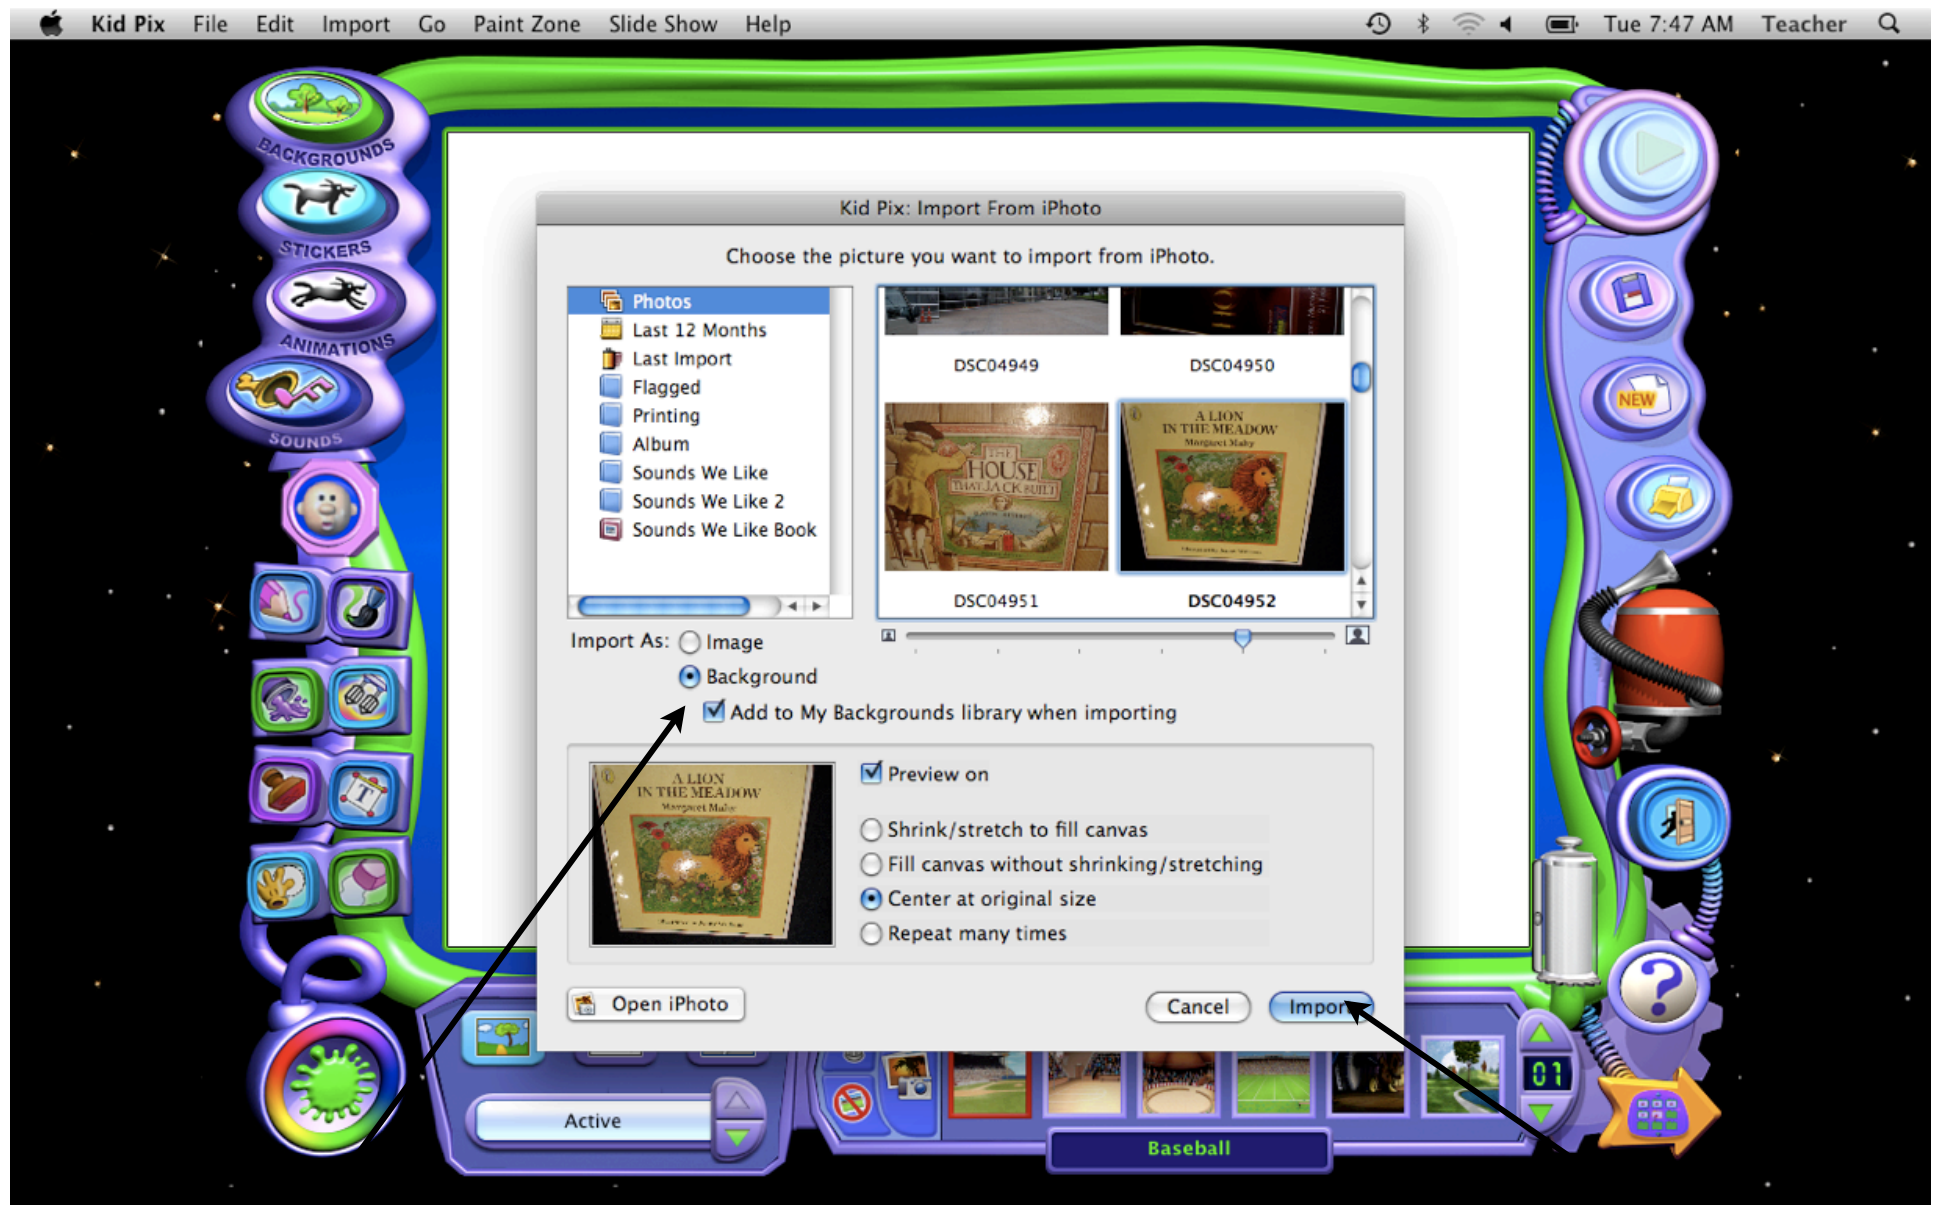

Go to next slide for simpler way.

Drag this slider to zoom your photos

3.

4.

5.

6.

7.

You can cut out parts of the picture.

8.

10. Record your voice and save it. After you save it drop it onto your picture and save your picture.

Working with Slide Show

In this chapter you will learn about:

- Creating and Opening Slide Shows
- Loading Pictures
- Editing Pictures
- Moving Pictures Around
- Customizing Your Slide Show
- Playing Your Slide Show
- Printing Your Slide Show
- Saving Your Slide Show
- Exporting Your Slide Show
- Creating Animations from Your Slide Show

Ignore all the little words
for now. Just follow the
picture icons and numbers

Creating and Opening Slide Shows

You can make a Slide Show with your pictures. Load pictures into your Slide Show and put them in any order you like. Add transition, audio, and page advance options. Then save, play, print, or export your Slide Show.

Going to Slide Show

You can go back and forth between the Paint Zone and Slide Show.

To go to Slide Show:

11.

- Click the **Go to Slide Show** button in the bottom-right corner of the Paint Zone, or choose **Go to Slide Show** from the **Go** menu.

Starting a Slide Show

You can create a brand new Slide Show or open an existing one.

To create a new Slide Show:

12.

1. Click the **Create New Slide Show** button at the bottom-left corner of the screen.
2. Load pictures into the slides. For details, see ["Loading Pictures" on page 53](#).
3. Click the **Save Slide Show** button and type a name for your Slide Show in the **Kid Pix: Save As** dialog.

The name of your Slide Show appears at the top of the screen and a saved Slide Show icon appears in the **Saved Slide Shows** tray.

To open a Slide Show:

- Click the icon for the Slide Show you want in the **Saved Slide Shows** tray at the bottom of the screen.

The **Saved Slide Shows** tray shows only those Slide Shows which were saved by the current Kid Pix user. To open other Slide Shows, choose **Open** from the **File** menu.

Loading Pictures

Each slide in the Slide Show can contain a Kid Pix picture.

Once you load the pictures, you can move them into any order you like. If you leave blank slides, Kid Pix will skip them when you play your Slide Show.

To load a picture:

13.

- Click the desired slide to see the **Load Picture** icon below it.
- Click the **Load Picture** icon.
- In the **Kid Pix: Load Picture** dialog that appears, navigate to the place where your pictures are stored and select the one you want (by default they are stored in the **My Pictures** folder).
- Click **Load**.

Perform this operation with as many slides as you need.

Editing Pictures

To change a picture you want to load, or to create a new picture, go back to the Paint Zone.

To go back to the Paint Zone:

- Click the **Go to Paint Zone** button in the bottom-right corner of the screen, or choose **Go to Paint Zone** from the **Go** menu.

Moving Pictures Around

Slide Show plays slides in the order they appear on the screen. (The slides are numbered so you can tell the order.) You can move slides into any order you want.

To move a slide by dragging:

- Drag the slide you want to move to the new location.
When you drag a slide, you see an insertion line that shows exactly where the picture will be placed.

Customizing Your Slide Show

You can set page advance options and add visual transition and sound effects to give your Slide Show a really exciting, unique appearance. For more information about transition effects, see ["Transition Effects" on page 56](#). For information on attaching sounds to your Slide Shows, see ["Audio Options" on page 57](#).

Page Advance Options

Page advance options tell Slide Show when to go from one slide to the next. You can have a different page advance option for each slide. You can tell Slide Show to display the next slide after a certain number of seconds, or to wait until the text of the slide is read aloud, or until you click with the mouse or press a key on the keyboard. If you do not set any page advance option, each slide will be shown for the time you have specified in Kid Pix Preferences. For more information, see ["Setting Up Kid Pix Preferences" on page 62](#).

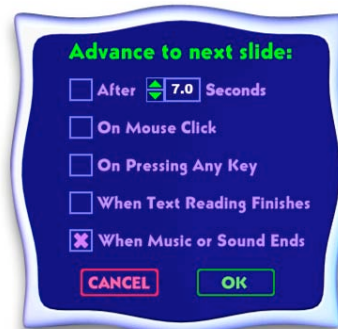

To set up page advance options:

- 1.** Click the **Customize Slide Show Effects** button. The customizing option buttons appear on each slide.

- 2.** Click the **Page Advance Options** button on the slide whose options you want to change. The **Advance to next slide** dialog appears.

- 3.** Select one of these options:

 - **After [Number] Seconds** lets you enter the number of seconds to wait between this slide and the next one. Choose this option if you are planning to export your Slide Show later as a movie. See ["Exporting Your Slide Show" on page 60](#).

If you do not want to have any transition effects, click the **No Transition** option.

The bottom scroll list shows you the sound effects associated with the visual effect you have selected.

4. Leave the sound as it is, select another, or click the **No Sound** option at the end of the list to make the transition silent.
5. Click **PREVIEW** to see how the transition looks and sounds.
6. Click **OK** to apply the selected effects.

Audio Options

Audio options tell Slide Show to play all the slide's sounds and text, play either the sound or the text, or not to play them at all.

To set up audio options:

1. Click the **Customize Slide Show Effects** button. The customizing option buttons appear on each slide.

Transition Effects
Options

Audio Options

Page Advance Options

16.

2. Click the **Audio Options** button for a slide you want to change.
3. Tell Slide Show what to do while this slide is showing:
 - Select **PLAY SOUND** to tell Slide Show to play the sound attached to this picture.
 - Select **PLAY TEXT** to tell Slide Show to read the text of this picture out loud.
 - Turn both options off to tell Slide Show not to play the sounds attached to the picture and not to read the text out loud.
4. Click **OK** to apply the changes.

Background Color

Slides in a Slide Show appear on a solid color background. You can change this color.

To change the background color for the current Slide Show:

1. From the **Slide Show** menu, choose **Change Background Color**.
2. Pick a color and click **OK**.

Playing Your Slide Show

You can now play your Slide Show to see all your pictures enlivened with the added effects.

To play your Slide Show:

17. →

1. Click the **Play Slide Show** button.
2. If your page advance options are set up to wait for a click or keyboard key press, you need to click or press a key to advance the slides.

To stop a Slide Show while it is playing:

- Double-click anywhere on the screen or press the **Escape** key on your keyboard.

By default, Slide Show plays only once, but it can be played continuously until you manually stop it.

To play a Slide Show continuously:

- Choose the **Loop (Play Continuously)** command from the **Slide Show** menu so that the checkmark appears.

To play a Slide Show only once:

- Choose the **Loop (Play Continuously)** command from the **Slide Show** menu again so that the checkmark next to the command disappears.

Using Manual Advance

Manual advance lets you advance the slides manually, while keeping your visual and sound transition effects in place.

To use manual advance:

1. From the **Slide Show** menu, choose **Turn Manual Advance On**.
2. Play a Slide Show by clicking the **Play Slide Show** button.
3. Click with the mouse or press any key on your keyboard (except **Escape**) to advance to the next slide.

Note: The **Escape** key stops the Slide Show.

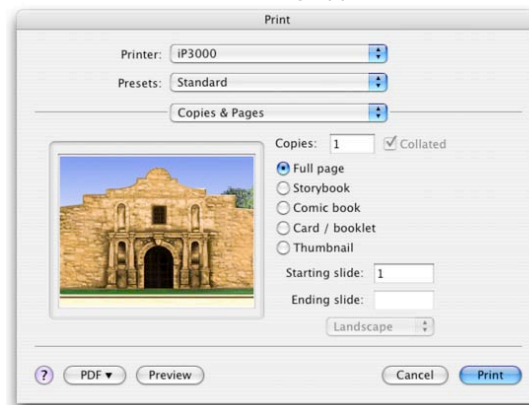

Printing Your Slide Show

You can print each slide of your Slide Show separately on its own page, or you can print small-sized slides on one page.

To print your Slide Show:

1. Click the **Print** button. The **Print** dialog appears.

2. Select one of these formats:

- **Full page** prints each slide on a single separate page. Type the number of the slide you want to print in the **Starting slide** box.
- **Storybook** prints two slides on each page.
- **Comic book** prints six slides on each page, with the slides placed in two rows. To print six slides on a page, select **Comic book** and type **1** in the **Starting slide** box and **6** in the **Ending slide** box, and then click **Print**. To print the next six slides, click the **Print** button again and type **7** in the **Starting slide** box and **12** in the **Ending slide** box, and so on.
- **Card / booklet** prints 4 slides per page. Slides are placed in two rows, one of which is upside-down. When you have printed the page, you can fold it in four to make a fun greeting card. You can also print just one slide on the first panel and then write on the other panels. To print four slides on a page, select **Card / booklet** and type **1** in the **Starting slide** box and **4** in the **Ending slide** box, and then click **Print**. To print the next four slides, choose **Print** again and type **5** in the **Starting slide** box and **8** in the **Ending slide** box, and so on.
- **Thumbnail** prints twenty-four slides on each page. To print twenty-four slides on a page, select **Thumbnail** and type **1** in the **Starting slide** box and **24** in the **Ending slide** box, and then click the **Print** button again. If your Slide Show is longer than that, click the **Print** button again and type **25** in the **Starting slide** box and **48** in the **Ending slide** box, and so on.

You can print your show into a book. This is a very cool way to create a picture book. Get it professionally bound and keep it in the library forever. Kids can create their own book or you can make a class book. You can make a class Big Book to read together. The kids can read along to the slideshow.

3. If you select **Storybook**, **Card / booklet** or **Comic book**, you can also choose one of these orientations:
 - **Portrait** prints the slides on a vertical page.
 - **Landscape** prints the slides on a horizontal page.
4. Click **Print** to print the Slide Show.

Saving Your Slide Show

Slide Shows are saved in the **My Slide Shows** folder (inside the **My Pictures** folder) by default.

To save your Slide Show:

1. Click the **Save Slide Show** button.
2. Type a name for your Slide Show.
3. Click **Save**.

Exporting Your Slide Show

You can export your Slide Show to play it with or without Kid Pix. Exported Slide Shows do not include the Text-to-Speech feature.

To export your Slide Show:

1. Choose **Export**, from the **File** menu.
2. Type a name for the exported Slide Show.
3. Navigate to where you want to save your exported Slide Show.
4. Choose an export format.
 - **Project As QuickTime Movie** can be played on any computer with or without Kid Pix. However, QuickTime format supports only the **Timer** advance option.
Use QuickTime player to open and play your exported Slide Show.
 - **Slide Show To Go** creates a folder with everything you need to play your Slide Show on a different computer with Kid Pix. Copy the folder to another computer then in the Slide Show part of Kid Pix, use the **Open** command from the **File** menu to open the Slide Show file in that computer's version of Kid Pix. Kid Pix will find all the files it needs to open your Slide Show.
5. Click **Export**.

To export a Slide Show to iMovie:

1. Open the **File** menu.
2. Choose **Export to iMovie**. The **Kid Pix: Export to iMovie** dialog appears.
3. Click the **NTSC** or **PAL** radio button to select the video standard for a Slide Show.

If you want to upload your show to your Blog or Wiki export it as a Quicktime Movie. When it is a Quicktime movie. You can also import it to Keynote.

18.

4. Choose **iMovie** or **iMovie HD** file format. iMovie HD is a new format supported by the latest iLife applications.
5. Type a name for the Slide Show you want to export.
6. Navigate to where you want to save your exported Slide Show.
7. Click the checkbox labeled "**Open new iMovie project with this clip inserted**" to create and automatically open a new iMovie project with this Slide Show only.
8. Click **Export**.

Note: Exporting a Slide Show may take a long time and the resulting document may occupy a lot of disk space.

Creating Animations from Your Slide Show

You can create simple animations using Slide Show projects you have created.

To set default animation options:

1. Choose **Kid Pix Preferences** from the **Kid Pix** menu.
2. Open the **Slide Show** pane in the dialog that appears and choose **No Transition** from the **Transition Effect** pop-up menu.

Note: When you choose **No Transition**, the transition sound effect automatically changes to **No Sound**.
3. Set the **Timer** interval to any value small enough for an animation. For example, to 0.1 second.
4. Click **OK**.

To create animation frames:

1. Create a picture or open one you have already created.
2. Add an object or several objects (stickers, text, and so on) that you want to animate.
3. Save the picture. Now you have the first frame of your animation.
4. Modify the added object or objects slightly (move and resize them, change the color, and so on).
5. Save your work as a different picture by choosing **Save As** from the **File** menu.

Tip: If you add numbers to picture names, it will be easier to see the order for frames in the animation.
6. Repeat steps 4-5 to create more frames for your animation.

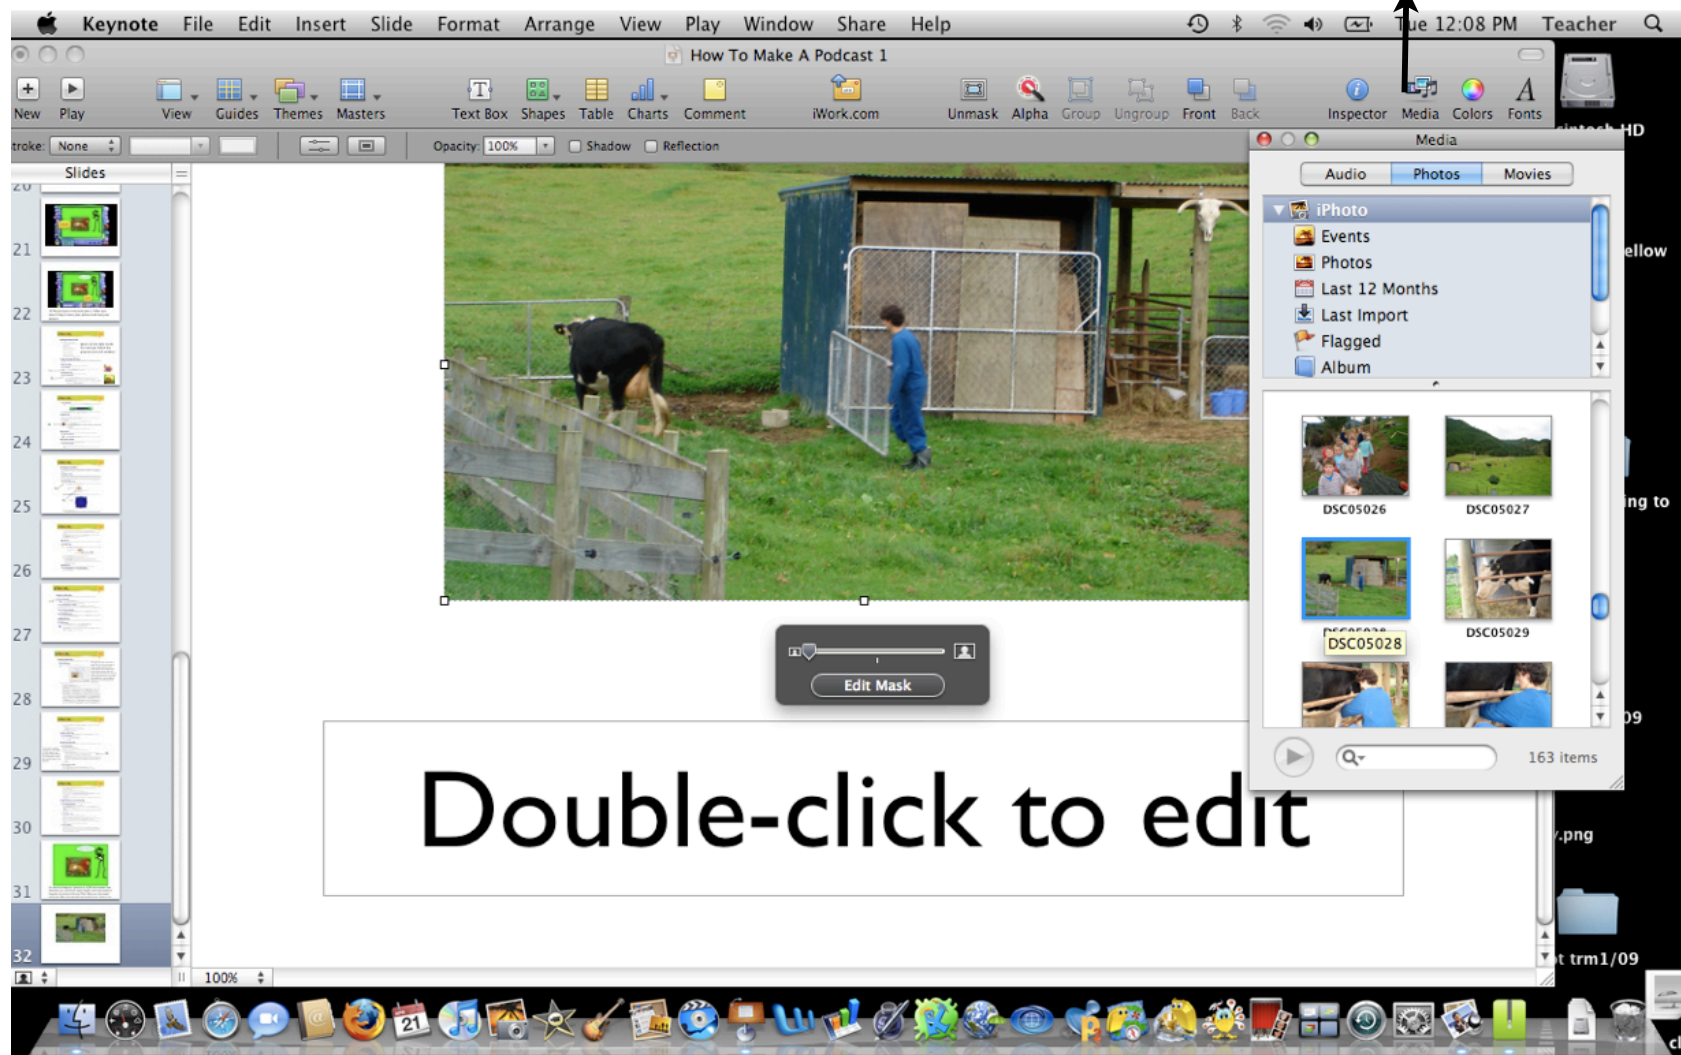

To create an animation:

1. Create a new Slide Show.
2. Load the pictures you have created for the animation. See ["Loading Pictures" on page 53](#).
3. Set or modify transition options as described in the ["Customizing Your Slide Show" on page 55](#).
4. Export your Slide Show either to iMovie or to QuickTime to get an animated cartoon. See ["Exporting Your Slide Show" on page 60](#).

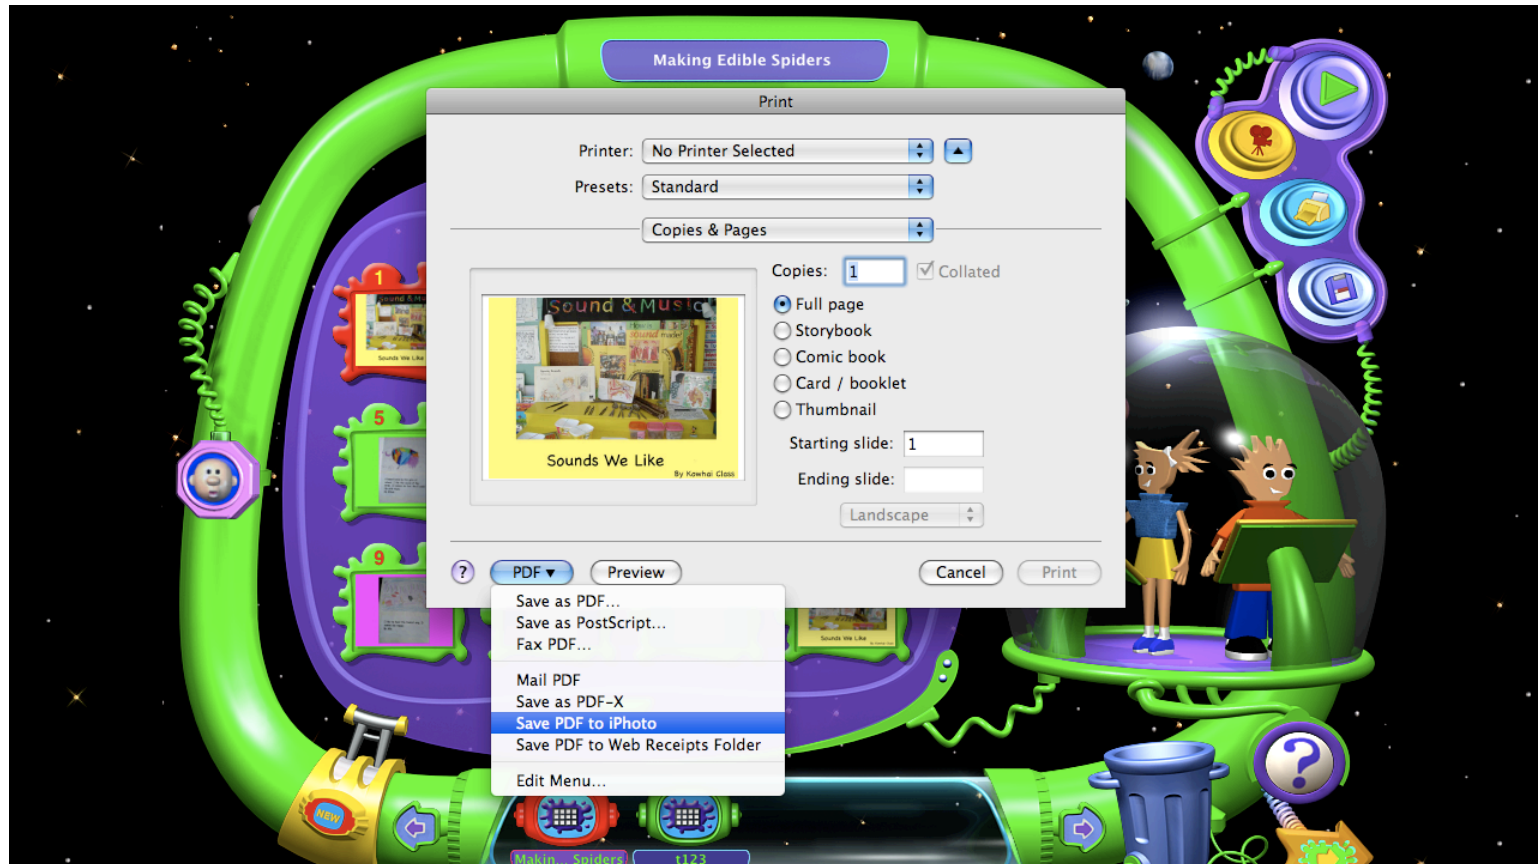

Go back and export a picture as a JPEG document. Save wherever you can find it easily. Open a new document in Keynote. Go-Insert-Choose. Then find your document and insert. Play around with importing music, photos, etc.

Click Media to find photos, music, and movies to import

To record voice go File-Record slideshow.

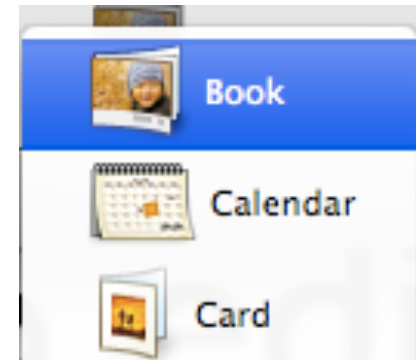

If you want to save a kidpix document to i-photo click print-PDF-Save PDF to i-Photo.

To Make a Book In i-Photo

Open i-Photo
and select an album.

Click

Click

Choose a theme and play around with the layout and background. You can change the font by going Edit-Font. You can play as a slideshow or print as a book. You can export it to an i-pod.

Ideas for Integrating ICT with literacy.

Record the class reading a big book. Listen. Teach reading with expression. Record again later in the week.	Read fairytales. These are great for discussing.	Design and illustrate a nursery rhyme by giving the story an original twist. Kidpix.	You can share your creations by uploading them to a BLOG or WIKI or the school Web site. Share them at assembly or with another class.
Record character interviews. Older children can do this in small groups.	Perform puppet plays and video them. Create a soundscape and turn it into a movie.	Create word or thought balloons to show what the characters in a story might be thinking.	Write and illustrate a book of poems. We made accrostic poems with our self-portraits and with photos. Put it in the school library.
Get the children to act out plays. Record the play and take photos. Make a podcast with photos corresponding to the action and dialogue.	Create a big book about the topic. Children take the photos and combine text and image in Kidpix.	Choose a favourite book and illustrate your own page in the style of the illustrator.	Create books for younger children in the school.
Recreate a legend in Kidpix. Illustrate and add voice.	Create an alphabet book. Use Kidpix illustrations and voice or use photos. You could sing!	Record the class and individuals reading poems with expression. Add sound effects.	
Create a soundscape for a story. Use real instruments and record.	Make a live news broadcast about a story.	Create a big book about a class excursion. Make a digital story in Keynote, Kidpix, or i-Movie.	

Coffee time?
Thanks for coming in
during your holiday.
Cheers, Tia
